ART

Explore the natural world – where shades of blue and green crash upon Atlantic coastline, and colour and light appear on the shaded forest floor – with an exhibition of new paintings by landscape artist Donald Teskey. *Ocean Frequency* is a celebration of Ireland's rugged seascapes, coastlines and hidden forest trails.

The acclaimed artist has found inspiration in the wilds of Ireland (and sometimes its cityscapes, too) for more than 20 years. Get lost in his works and travel from seaside to the boglands of north Mayo, to a place where formal landscape painting merges with abstract art.
